ANKIT RAJ

+91-6205323586 — ankitraj5309@gmail.com — linkedin.com/in/ankitraj-pandey — github.com/AnkitCodesHub — Patna, India

SUMMARY

B.Tech graduate (2026) and fullstack developer who has built and shipped production web applications using React, Node.js, Express, and MongoDB. Comfortable working across the stack — from designing responsive UIs to writing backend APIs and managing databases. Two engineering internships with cross-functional team collaboration and delivery under daily deadlines. Looking for a team where I can write real code, get reviewed, and grow fast.

EDUCATION

B.Tech, Electrical Engineering — Govt. Engineering College, Nawada *2022 – 2026 — CGPA: 7.65/10*
Class XII (CBSE) – *2021 – 72.4%*
Class X (CBSE) – *2019 – 77.8%*

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Kotlin, C
Frontend: React.js , HTML5, CSS3, Flexbox, CSS Grid, TailwindCSS
Backend & APIs: Node.js, Express.js, RESTful API design, CRUD operations, middleware
Databases: MongoDB (schema design, queries, CRUD), Firebase Realtime Database
Tools: Git (branching, PRs, code reviews), GitHub, VS Code, npm, browser DevTools
Concepts: Data Structures & Algorithms, OOP, debugging

PROJECTS

Password Manager — Fullstack Web Application *React, Node.js, Express, MongoDB*
Live: passop-mongo-zrll.onrender.com — Code: github.com/AnkitCodesHub/passop-mongo

- Built a complete React frontend with functional components and Hooks-based state management, connected to an Express/Node backend through RESTful APIs.
- Implemented full CRUD operations with input validation, error handling, and data storage in MongoDB. Tested every endpoint against malformed input and edge cases before deployment.
- Handled asynchronous API calls using async/await and fetch, with loading states and graceful error handling across the UI.

Smart DND Automation App *Kotlin, Android Telephony APIs*
Code: github.com/AnkitCodesHub/smartDND

- Built an Android app that automatically sends a custom message to incoming callers based on a status set by the user, replacing the need to manually reject calls and reply.
- Integrated Android telephony and SMS APIs at the platform level. Tested across multiple Android versions and device configurations to handle version-specific API differences.

EXPERIENCE

Technical Intern — Power Transmission — SBPDCL *Dec 2025 – Jan 2026*

- Worked in a cross-functional engineering team analysing operational datasets, designing test scenarios, and delivering structured analytical reports under daily deadlines.
- Picked up domain-specific workflows quickly and reduced dependency on senior engineers for routine reporting tasks over the course of the internship.

Technical Intern — Power Distribution — BSPTCL *Jun – Jul 2025*

- Verified system configurations against specifications and compiled fault reports with root-cause analysis to drive process improvements.
- Documented findings and coordinated with field and technical teams to ensure faults were tracked through to resolution.

Student Coordinator — Training & Placement Office, GEC Nawada *2025 – 2026*

- Coordinated scheduling and stakeholder communication across concurrent placement drives, maintaining candidate data accuracy in a fast-paced environment.
- Managed logistics for company visits and on-campus interviews, handling last-minute changes while keeping all parties informed.
